Indicate ship to address

STEP 7 Purchase Order Number

How to Measure

NOTE: Smallest unit of measure is 1/8".
Blinds installed on windows near wall or baseboard heaters must clear the heaters by 12" above and 6" to the side.

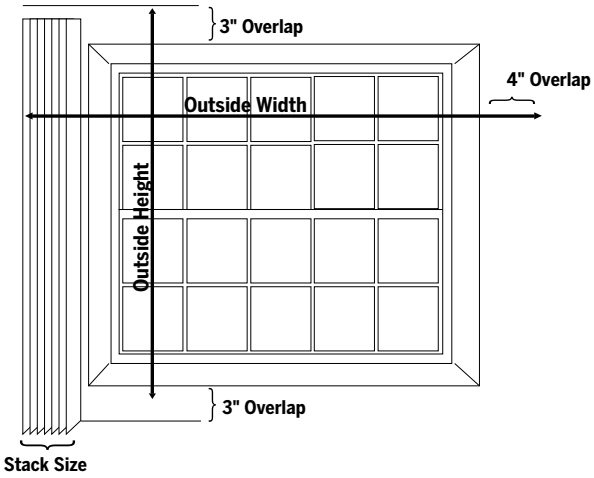

Inside Mount (IM) Installation - Patio Doors and Windows

To find width: Measure the opening across the top, where the headrail is to be installed, from inside of window frame on left to inside of window frame on right. Round the measurement down to the nearest ⅛". A minimum depth of 2½" is needed to install inside the window.

To find height: Measure from the inside top of the opening on the left, at the center, and on the right to the sill; round the measurement down to the nearest ⅛" and note the smallest dimension. Do not make any allowances: the factory will make all adjustments so the headrail will fit the opening properly and the vanes will clear the sill by ¼" to ½".

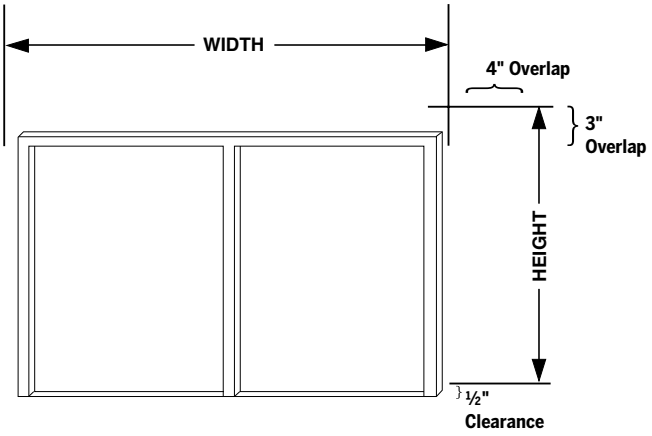

Outside Mount (OM) Installation - Windows

To find width: Measure the width of the area to be covered at the place where the headrail will be installed to the nearest ⅛". Blind should overlap opening at least 4" on each side to ensure privacy. To maintain the maximum view, allow adequate overlap and consider the stack width. To calculate stack dimensions, consult the Vane Count and Stacking Chart on page 18.

To find height: Measure the height of the area to be covered and round down to the nearest ⅛". Blind should extend at least 3" above and 3" below opening or window frame. For installations to the floor, make adequate allowance for carpeting. Specifying OM measurement means the factory makes no allowances.

Outside Mount (OM) Installation - Patio Doors

To find width: Measure the width of the area to be covered at the place where the headrail will be installed to the nearest ⅛". Blind should overlap opening at least 4" on each side to ensure privacy. To ensure easy access through the door and allow adequate overlap, consider the stack width. To calculate stack dimensions, consult the Vane Count and Stacking Chart on page 18.

To find height: Measure the height of the area to be covered and round down to the nearest ⅛". Blind should extend at least 3" above opening or window frame. For installations to the floor, deduct ½" for proper clearance. Specifying OM measurement means the factory makes no allowances.

Extension Brackets - Extends from 2" to 4"

Recommended for outside mount only when an obstruction protrudes beyond the window, such as window cranks and other mechanisms. Extension brackets are adjustable. Must request at time of order. See page 22 for part numbers.

Critical Dimensions

HEADRAIL DIMENSIONS AND INSTALLATION DEPTH REQUIREMENTS

Headrail is 1 7/16" deep x 1 1/2" high.

Minimum Depth to Install	Inside Mount	2 1/2"
Flush Mount Headrail	Inside Mount	3 "
Flush Mount Vanes	Inside Mount	3 3/4"
Flush Mount DesignLine Valance	Inside Mount	5"
Flush Mount Traditional Valance	Inside Mount	6 1/4"
Flush Mount Transitional Valance	Inside Mount	5 1/2"
Flush Mount Visions™ Valance	Inside Mount	4 3/4"
Minimum Clearance from Wall/Window to Headrail	Inside and Outside Mount	2 1/4"

(Headrail will protrude)

SIZE LIMITATIONS

	One Way Minimum Width	Dual Stack Minimum Width	Center Stack Minimum Width	One Way, Dual, and Center Stacks Maximum Width	Minimum Height-Vinyl	Minimum Height-Fabric	Maximum Height
Inside Mount (IM)	13 3/8"	25 7/8"	48"	188 3/8"	8 3/4"	13 3/4"	144"
Outside Mount (OM)	13 1/8"	25 5/8"	48"	188 3/8"	8 3/4"	13 3/4"	144"

FACTORY DEDUCTIONS

	Inside Mount	Outside Mount
Headrail*	1/4"	0"
Height	1/4"	0"
Vane Only	1 3/4"	1 1/2"

*Headrails are cut 1/2" smaller than the ordered width. Published mounting deductions reflect the finished headrail width with end caps installed.

Valance Deductions		
Valance Style	Outside Mount	Inside Mount
Design Line	0	- 1/8"
Traditional	+ 1/2"	- 1/4"
Transitional	+ 1/2"	-1/4"
Wood	+1"	- 1/8"

OUTSIDE MOUNT VALANCE RETURN MEASUREMENT

Standard valance return for Designline (Rounded Edge) is 4 1/4". Standard valance return for Designline (Tailored Edge) is 5 1/4". Standard valance for Traditional and Transitional valances is 4 3/8". Standard valance return for Visions valance is 4 7/8". If a longer return is needed, measure the inside return length of the valance as shown and provide measurement. See page 18 for minimum and maximum return length as well as other valance measurements.

Features and Benefits

LIGHT CONTROL

Levolor presents a beautiful window covering that functions as a light filtering drapery and a room darkening shade all in one. Perfect for adding ambiance to formal rooms or casual settings, Levolor Perceptions Room Darkening Sheers are the most versatile window covering for any décor. Choose fabric, valance and control options that fit any room.

Light Filtering
Fabrics filter light when vanes are open

Room Darkening
Vanes block light when vanes are rotated closed

Options and Upgrades

CORDLESS WAND CONTROL - STANDARD

Cordless Wand Control eliminates dangling cords and chains, providing safe and smooth operation.

- One-control convenience - vanes are rotated and traversed with the wand
- Streamlined appearance
- Increases safety
- Sizes listed on page 6
- Available in styles and finishes below

	Wand Finishes			
Wand Styles	White	Off White	Satin Nickel	Bronze
Traditional	67171	67172	67174	67176
Transitional	67271	67272	67274	67276

controls on left or right

Center Stack
For Wand Control, wand on left and right

Light Control Index

Each collection is rated for light control. This convenient indicator can be found next to the Available Colors grid on each pricing page.

Cleaning Guide

Your Levolor Vertical Blind seldom requires cleaning because the vanes hang vertically. However, all products and furnishings get soiled due to condensation, humidity, smoke and steam.

Fabric Vanes
Periodic dusting or vacuuming will keep the fabric fresh. Spot clean any stains by applying a mild soap and water solution with a sponge or cloth. Check color fastness first by cleaning an inconspicuous area of the vane. Do not machine wash or dry clean.

Vinyl Vanes
Apply a mild soap and cold or warm water solution with a soft cloth or sponge. Abrasive or strong cleaners may scratch or mar the vane's surface. Dry with a cloth towel to avoid water marks.

The suggested cleaning instructions must be followed to maintain the lifetime limited warranty.

Options and Upgrades

CORDLESS WAND CONTROL - STANDARD

Cordless Wand Control eliminates dangling cords and chains, providing safe and smooth operation.

- One-control convenience - vanes are rotated and traversed with the wand
- Streamlined appearance
- Increases safety
- Sizes listed on page 6
- Available in styles and finishes below

	Wand Finishes			
Wand Styles	White	Off White	Satin Nickel	Bronze
Traditional	67171	67172	67174	67176
Transitional	67271	67272	67274	67276

Center Stack
Wand on left AND right

VANE OPTIONS

Standard

Fabric Vanes

Fabric vanes come standard with sewn-in weights. All fabrics available with room darkening backing.

S-Shaped Vanes

S-shaped vanes overlap to create a soft, ripple fabric effect. The interlocking action of the vanes block out light and enhance room darkening.

STANDARD DESIGNLINE™ VALANCE

- Comes standard on each blind at no charge
- All S-Shaped collections come with curved valance inserts
- Valance color coordinates to vane color
- Maximum width is 188 3/8"

Tailored Edge

Round Edge

	Height	Depth	Min Return	Max Return	Std Return
Designline® Valance Tailored Edge	3 ¾"	1 1/8"	2"	6"	5 ¼"
Designline® Valance Round Edge	3 ¾"	1 1/8"	2"	6"	4 ¼"

See page 5 for valance return measurement instructions.

UPGRADES

- All S-Shaped collections come with curved valance inserts
- Valance insert color coordinates to vane color
- Maximum width is 188 3/8"

Traditional valance upgrade

Transitional valance upgrade

Traditional and Transitional valance trim colors:

	White	Off White	Warm Grey	Chocolate Brown
Traditional Valance	67171	67172	67173	67175
Transitional Valance	67271	67272	67273	67275

	Height	Depth	Min Return	Max Return	Std Return
Traditional Valance	5 1/8"	2 3/8"	2"	6"	4 3/8"
Transitional Valance	4 3/8"	1 1/2"	2"	6"	4 3/8"

See page 5 for valance return measurement instructions.

Visions™ valance upgrade

Visions™ valance colors*:

White	Sand	Pacific Sand	Honey Pine
67110	67403	67502	67505

Lush Oak	Pecan	Walnut	Mahogany
67500	67501	67504	67503

*Coordinates with Levolor Custom Visions Faux Wood Collection.

	Height	Depth	Min Return	Max Return	Std Return
Visions™ Valance	3"	3/8"	2"	6"	4 7/8"

See page 5 for valance return measurement instructions.

CUTOUT FEATURE

Vertical blinds may be cut out at the bottom to accommodate obstructions such as air conditioners. Use the largest width and height size dimensions of the blind to determine price and add the cutouts surcharge.

Please indicate number of vanes at each length. To estimate number of vanes to be cut, divide cutout width by 3 1/8" and round up to the next vane. Order must be accompanied with a detailed diagram.

S-SHAPED VANES

To provide superior room darkening, it is important S-shaped vanes nest correctly. Below chart indicates Default Vane Face Direction for each control and stack option. Vane Face Direction is the direction of the patterned side (face) of the vane when tilted open.

How to use the chart:

1. Find Control Position and Stack for Blind (under Headrail).
2. See Default Direction for that Control and Stack (under Vane Face).
3. If Default Direction is not desired, select Optional Direction and indicate on order.

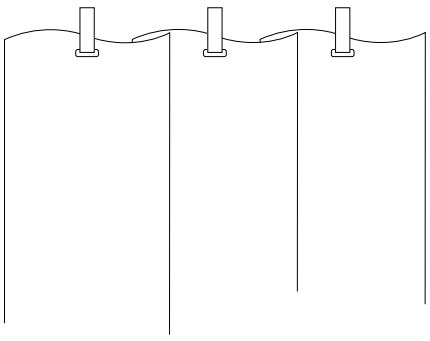

Example: Vane Face Direction = Left

Note: When ordering replacement S-Shaped vanes, please specify original order control and stack positions.

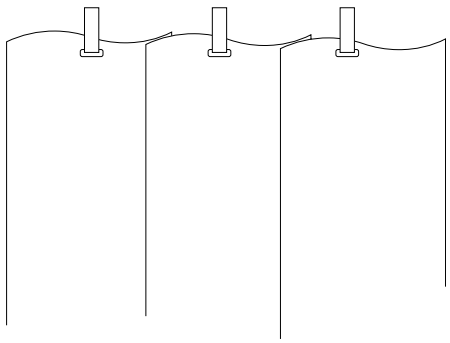

Headrail		Vane Face	
Control Position	Vane Stack	Default Direction*	Optional Direction*
Left	Left	Left	Right
Right	Right	Right	Left
Left	Right	Right	Left
Right	Left	Left	Right
Right	Dual	Right	Left
Left	Dual	Right	Left
Right	Center	Right	Left
Left	Center	Right	Left

Vane Stack = Side where the vanes stack

*Direction of patterned side of vane when tilted open.

Vanes nest correctly for optimum light control.

Vanes nest incorrectly, preventing optimum light control.

How To Use The Chart:

1. Select stack type
- One Way
- Dual

2. Select appropriate clear opening width

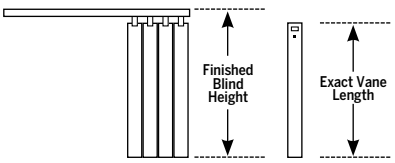

3. Order blind width in far left column
Note: Dual stack requires even number of vanes

*Clear opening chart is for outside mount only.
*For center stack, use one way stack column.

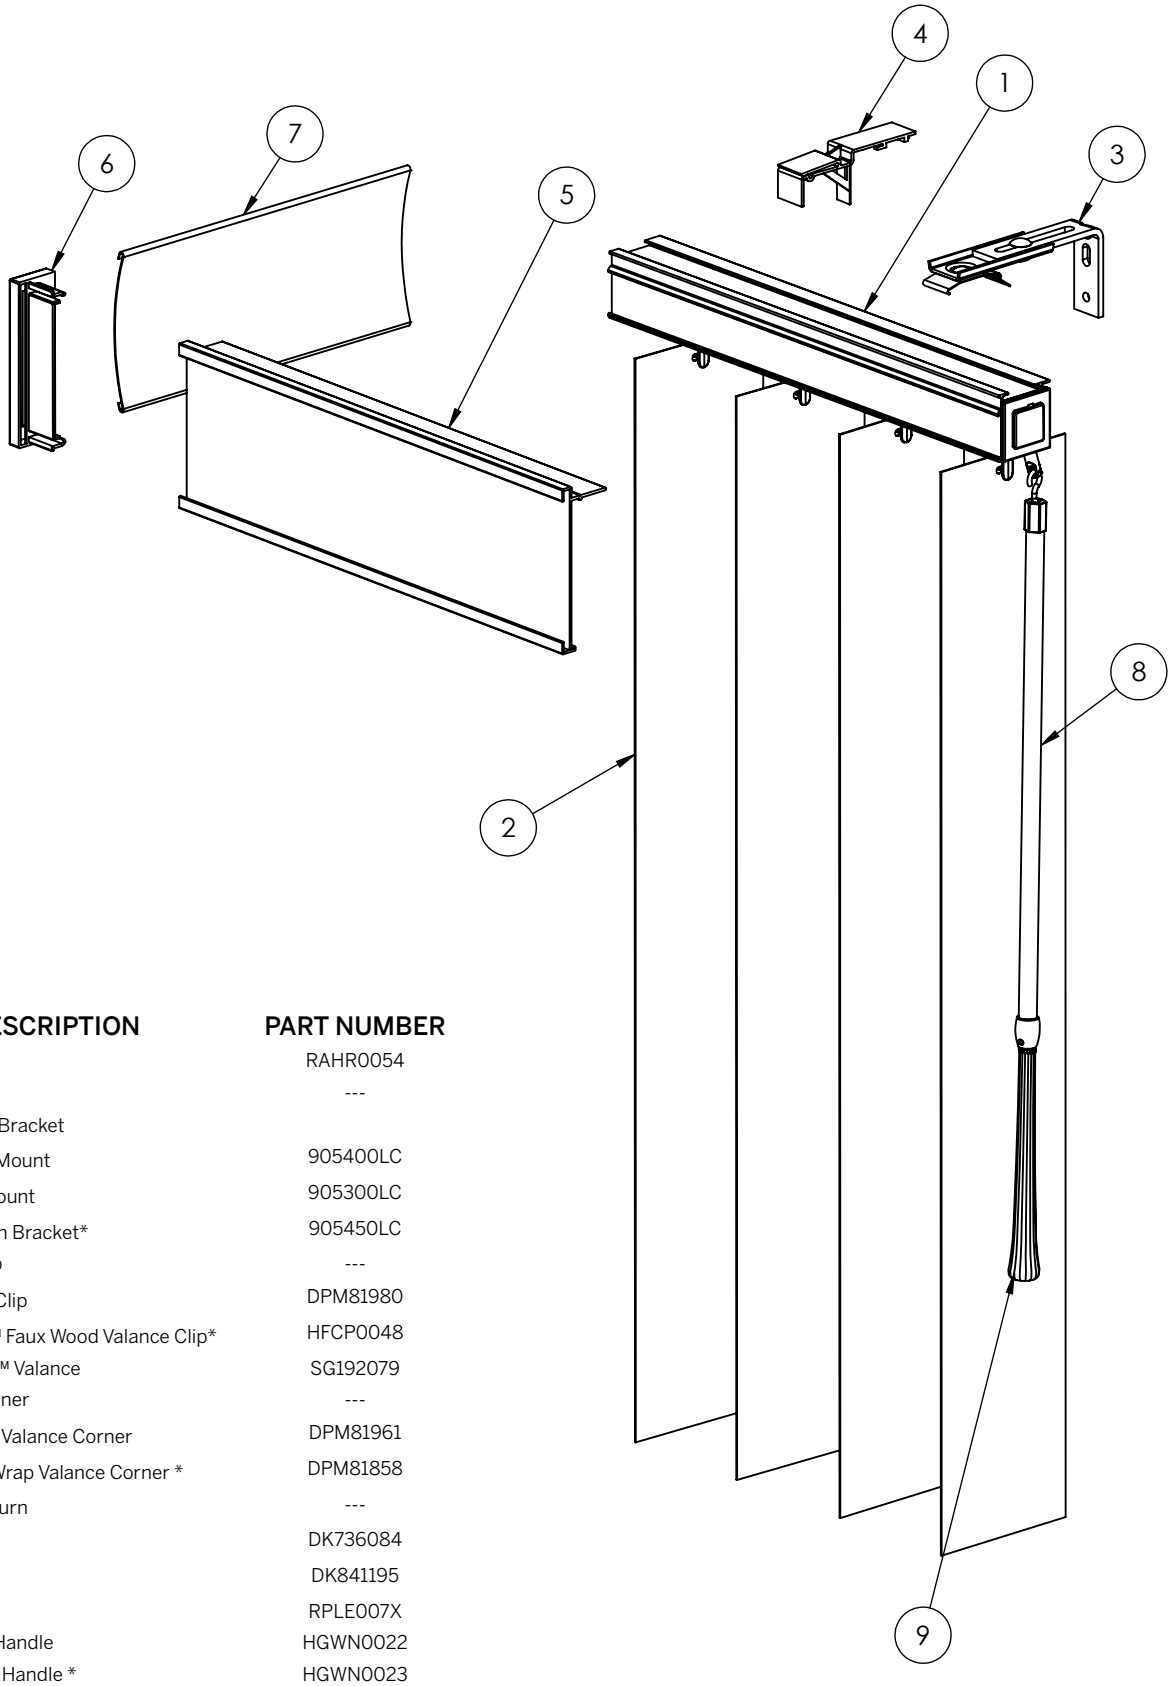

REPLACEMENT VANES

Replacement vanes may be ordered to replace damaged vanes or for a decorating change. When ordering, indicate the style of blind and the number of vanes needed. Specify Finished Blind Height (height of blind including headrail) or Exact Vane Length (length of a vane excluding the headrail).

Note: There is no guarantee of color match to the original order. Pricing for individual vanes is on the far right of each price grid.
